Lending Criteria Guidelines

These guidelines are designed to give general guidance to mortgage brokers on the Melton's lending criteria. The guidelines summarise our minimum high level criteria required as part of our mortgage underwriting process. In addition, the Melton applies a number of other credit assessment tools which may result in an application being declined, despite appearing to meet the guidelines documented.

The Melton reserves the right to change its lending policy at any time, however, we aim to ensure this document reflects the Society's current approach to mortgage lending.

Please note the Society will lend in England and Wales only. All underwriting is carried out manually. For all mortgage applicants the Society uses a credit reference agency to complete a voters roll search together with a credit search.
